MobiS: The Vision
Mobile-IP Based Communication Platform

• Provide basic technologies needed for ALL-IP UMTS networks
• Design and realize the necessary components for seamless mobile communication
• Support VHE-Like services based on Internet protocols
• Work towards an IP-based service creation environment
Telephony Lab

• Implementation of SIP stack and applications
• Interoperability and quality evaluation of telephony components from different vendors (Cisco, Siemens, 3Com, U. Columbia …)
• Involvement in IETF, SIPForum …..
Money and People

› Groups at Fokus need foreign financing of > 70%
› SIP proxy is a practical thing but not fancy
  ▪ How to finance something that does not sound fancy
› Solution
  ▪ Make SIP sound fancy!
    • It is not VoIP but NG multimedia communication platform
    • It is not CPL but service creation platform
    • It is not IP but IPv6
  ▪ Work efficiently
    • Consulting for DT ....
  ▪ Public funding
    • Jiri is given money for travel and do for business plan
