

# What is Kamailio?

[www.kamailio.org](http://www.kamailio.org)

- Kamailio is the core building block for a modern VoIP network!
- Provides Core services:
  - Registrar
  - Proxy
  - Load-Balancer
  - Router
  - Application server
- Kamailio is no PBX, it is a SIP-Proxy/-Router!
- Foundation of many different custom SIP services
- In use at 1&1, Telefonica, QSC and many more

# Fancy new features!

Hall 7.2b, booth 112
